- (2) Today what the children are exposed to ?
- (3) What we are fortunate of ?
- (4) What has become a passion in the emerging world ?
- (5) What according to Botanists, are the bonsai trees ?

Questions :

In the emerging world scenario, interior decoration has become a passion and a dictum for healthy living the art of planting in small pots gives rise to small neat structures of plants. These are easy to grow indoors. They need soul, air, light and water to nourish and flourish themselves. Plants can be grown in the house all the year round. Botanists say that bonsai are ornamental trees or shrubs grown in pot. They are artificially prevented from reaching their normal size. The Japanese specialize in bonsai and likebana.

The beauty of a drawing room and a living room is best felt when there is an element of nature's pride possession - a tree, or an indoor plant or even a sapling. Today children get less chance to see the greenery. They are more allured and exposed to technology driven software parks. Fortunately we have come to a point where we can bring the world of flora to our homes.

(1) Bacterial cellwall is made up of _____

(a) Peptidoglycan

(b) Protein

(c) Chitin

(2) Agar-Agar powder is obtained from

(a) Fungi

(b) Bacteria

(c) Algae

(3) The study of Fungi is called _____

(a) Virology

(b) Mycology

(c) Phycology

(4) Malaria is caused by

(a) Bacteria

(b) Fungi

(c) Protozoa

(5) Which one of these is used for Bread making ?

(a) Yeast

(b) Virus

(c) Plant cell

1. Role of Linnaeus in classification.....
 (A) Binomial nomenclature method (B) Classification on the bases of Habitat (C) Modern classification method (D) All
 2. Which of the following is species?
 (A) Rana (B) Tigris (C) Panthera (D) Homo
 3. What is called the space between digestive track wall and body wall?
 (A) Coelom (B) Acoelom (C) Metamerism (D) None of above
 4. It is not a character of phylum Coelenterate?
 (A) Presence of Coelenteron (B) presence of hypostome (C) Presence of tentacles (D) Pore body
 5. The cell of endoderm of Leucosolenia?
 (A) Glandular cell (B) Collar cell (C) Collencytes (D) All
 6. Who studied Golgi complex first?
 (A) Robert Hook (B) Robert Brown (C) Cernilo Golgi (D) Swan
 7. In which of the following stage of mitosis the chromosomes arrange on equator?
 (A) Prophase (B) Metaphase (C) Anaphase (D) Telophase
 8. Which of the following is not a species of Honey bee?
 (A) Indica (B) Florida (C) Murry (D) Dorsata
 9. Namatocyst is a character of which phylum?
 (A) Porifera (B) Nematelminthes (C) Arthropod (D) Coelenterate
 10. Who gave law of Dominance?
 (A) Robert Hook (B) Lamarck (C) Mendel (D) Flaming

- 3 Give answer as per instruction (Any Eight (08))
21. Mention the class of Amoeba and Paramecium.
 22. Mention the two important characters of phylum Nematelminthes.
 23. Describe: Canal system of Leucosolenia.
 24. Mention the type of nematocyst on the bases of structure and function.
 25. Describe: Digestive system of Ascaris.
 26. Give the name of stages of plasmodium passes in mosquito.
 27. Mention the important of Mitosis.
 28. Aim of vermiculture?
 29. Describe: Types of Chromosome
 30. Describe: type of Prawn culture.

20. Arrange the following animal in to their respective phylum.
19. Give the scientific name of Hydra.
18. Give the name of two boats used in prawn catching?
17. What is supersider?
16. In one person Antigen - A and B both present in the RBC of the blood and antibody in the blood plasma is absent so, what is the blood group of the person?
15. Give only name of chromosome type.
14. What is bilateral symmetry?
13. Which protozoan is responsible for Malaria?
12. Collar cell is a character of which phylum?
11. Give the outline classification of phylum Nematelminthes.

2 Short answer questions

- 4 Give answer as per instruction (Any Four (04))
16
31. Mention the characters of phylum Porifera.
 32. Describe: Sexual reproduction in Hydra.
 33. What will be the ratio of F₁ and F₂ generation when pure tall pea plant cross with pure dwarf plant?
 34. Describe: Cell cycle
 35. Explain: Formation of purl
 36. Draw a labeled diagram: Animal cell
- 5 Write a detail note (Any three (03))
18
37. Mention the characters of phylum Coelenterate and give its outline classification.
 38. Describe: Life cycle of Plasmodium in human.
 39. Write a note: Apiculture
 40. Describe: Mitosis
 41. Describe with example: Co dominance and incomplete dominance
